

## **FITTING INSTRUCTIONS 4 WINTER COVERS**

Immediately following receipt of your Winter Debris Cover check that you are completely satisfied that its sizing and specification are to your satisfaction (Measurements can differ up to 50mm, this is deemed to be within our manufacturing tolerance.)

### **Best Results**

Your Winter Cover will provide good protection from debris and other objects contaminating your pool. In the interests of safety, children, pets and livestock should never be allowed near the pool, or stand, sit or jump on the cover. It is Not a Safety Cover

### **Fixing the cover**

Each Power Plastics Winter Debris Cover has reinforcing on each corner and rubbing strips on the underside at regular intervals around the perimeter to protect it from chaffing.

Covers are normally made 30cm larger than the pool all over so it will act as a barrier against leaves and debris.

You will find it useful if you position the cover using weights to ensure that the overlap is equal on all sides. You can then start to position the springs at the corners first, or if an irregular shaped pool at its extremities. A 6.5mm hole should be drilled approximately 75cm from the edge of the pool. Place the '9' pin in the hole and then thread the webbing through the end of the spring and lightly tension. This should be done until all springs are in position. Then tension the cover so that it is like a 'drum skin' not resting on the water.

As a final check, inspect the cover and make certain that the rubbing strips are over the coping stones. If not this will wear the mesh away very quickly. If the area is very rough or sharp you may wish to place felt under the cover to stop abrasion.

## **Springtime**

When you remove the cover from the pool hose it down and remove any dirt deposits left on the cover. The springs should also be removed and the cover stored in a clean dry bag away from hot pipes, chemicals and vermin until required in the autumn. We do not recommend that the winter cover is to be used during the summer season. If your cover needs some repairs then please send it back to us before the end of August so we can it back to you for the Autumn
